

## **Senior Web-Mobile App Developer**

This is a great opportunity for a professional Test Engineers to hit the ground running and join an exciting business with CODECDEV at a time of continuous growth and innovation. You will have the chance to work with the latest technologies and services in the IT world and will have ample opportunities to grow, learn and benefit from the success of the business.

### **Job Description**

- Review requirements, specifications, and technical design documents to provide timely and meaningful feedback.
- Designing and implementing new features both on your own and as a member of a feature-driven team.
- Creating client-side branding in a complex rich-client application.
- Design and implementation of new features to agreed timelines.
- Following sound software design, process, and quality practices, proactively participate in design and code reviews.
- Provide mentoring and technical support to more junior members of the team.
- Assist with the maintaining and support of new and existing features by liaising with the support teams to diagnose and resolve issues.
- Participating in all facets of team development by actively participating in staff mentoring and personal development.
- Keeping abreast of new technical developments to enhance or revolutionize the product and customer experience.
- Occasionally provide out of hours support for the product.
- Track quality assurance metrics, like defect densities and open defect counts
- Stay up to date with new testing tools and test strategies.

### **Job Qualification**

- Computer engineering or computer science bachelor.
- 5+ years proven experience in modern Web development using HTML5, JavaScript, CSS3, jQuery & responsive web design (RWD) skills.
- 3+ years of experience building web and mobile applications using Angular 2+, Ionic 3+ and Typescript. Knowledge of AngularJS (1.x) and NodeJS a bonus.
- Strong Object-oriented Design & Programming skills.
- Excellent written and verbal communication skills using the English-language.
- High level of attention to detail and strong aptitude for learning new technologies.
- Experience using Adobe Dreamweaver.
- Experience in a non-scripting programming language e.g., Objective-C/C++/C#/Java on Windows and/or Linux environments.
- Experience in writing multi-threaded applications.
- Experience with modern Client/Server architectures.
- Experience with distributed architectures.

- Experience with TCP/IP Socket Programming.
- Familiarity with JSON, XML and XPath technologies.
- Experience of software testing and methodologies.
- Experience of software debugging.
- Knowledge of common design patterns would be a distinct advantage.
- Experience of cloud-based solutions using AWS.
